Introducing the Concept of Remote Security in India

GREY VOLK

CORPORATE & SECURITY SERVICES PRIVATE LIMITED

AI Secured Smart Societies

Grey-volk an exclusive team of ex Indian and Israeli Special Forces Operatives along with NSG Black Cat Commandos, and tech support from Urban AI, a UK based Company. Presents the concept of Remote Security for the first time in India

AI Secured Smart Society Project

85-94% of breaches are caused by Human Error

✓ Preven
☐ Cure

Proactive security by predicting and preventing potential attacks before they cause damage

Enforces society rules

Our AI driven technology minimizes Human Error

The concept of Remote Security utilizes fewer manpower integrated with technology to cut down your costs by 20%
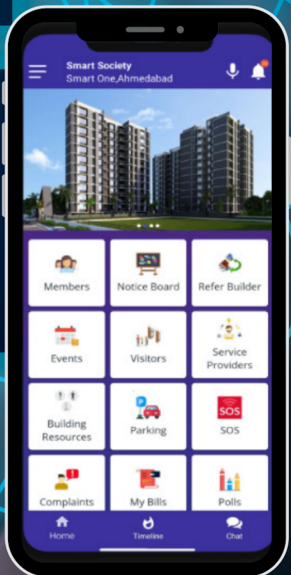

Integrates cyber and physical security

Entirely flexible & custom made solutions

Seamless entry based of biometrics & pass codes

App based unique solution

Interaction with Command Centre

Active and preventive AI technology

Speed control

AI based Intruder detection

Machine enforced patrolling

ACCESS CONTROL

■ Members

Seamless and hassle free entry of members based on facial recognition and License Plate readers

■ Guests

Pre-approved

With a tap on our App, members can send a scan code to the invitees.

This Scan code can be used for hassle free access at gate & building

Not Pre-approved

For all guests who do not a pre-approved code, can operate a touch pad at the entry gate and generate an instant approval from the resident granting access

Access only to specific buildings
Al data stored for smooth entry in the future
If previous data held, jump to seeking access

Theft Prevention

Protects your valuables as if they were our own, with the latest technology and expertise

Car theft

Every time a car exits the gate, AI cameras match the drivers facial data with LPR. If the driver has not been registered then access is denied

Theft by employees

Theft by employees is a major concern in Societies.

Our AI powered solution, analyzes every employee while entering the campus and monitors each time they exit a building.

On exiting the society, all the visuals with irregularities are stitched and displayed to aid the security staff in performing his duties

Intrusion
Detection

Detection & Prevention

As part of the premium package, we offer a complete intrusion detection system.

Our AI programmed cameras can detect any movement close to your boundary walls, and alert the security staff even before there has been a breach .

The Remote Security concepts revolves around proactive & predictive response to thwart any breaches

Special
Features

EMERGENCY

In case of a medical emergency, just a tap on the emergency button would send the members live location to the Command center. The staff on duty would arrange immediate evacuation

ALWAYS IN REACH

The App features a button that would instantly connect the member to the Command Center. Our Staff manning the Command Center shall respond to any situation

OVERSPEEDING

Our programmed cameras shall detect any car over speeding and initiate continuous vibration on the drivers phone number with a notification to slow down

CUSTOMISABLE

Our solutions are not to limited to the ones stated. Every feature is customizable and can be altered to suit the specific requirement of your Society
